

### DTSC Email Verifying Intent of New Sampling

The following unedited email correspondence is between DTSC Division Chief Dot Lofstrom and IUSD Director of Business Services John Fogarty. Ms. Lofstrom clarified the intent of the March 2, 2016 letter from the DTSC requesting additional “conformational” sampling of the Portola High School site.

Thank you, yes.

Because we did not copy people appropriately on yesterday's letter, I will be re-sending later today. The letter will not change but I will clarify in my email that this letter is directed at collecting conformational samples, not reopening the investigation. I will clarify that I believe this work can be done quickly with minimal disturbance and with little or no impact to your schedule. I will clarify that site safety is not in question. Finally, I will be clear that we will work closely with you on developing a work plan that will then be available to interested stakeholders prior to final submittal and implementation.
